## Customer Reviews

As always Robin Hopper does not fail to please. This book is packed throughout with valuable and helpful information. If you're a production potter or would like to be -- or if you just want to make better wares for your own home or teach your pottery students how to make pieces they will enjoy and be satisfied with, you will love this book.

I have all of Robin Hopper's books (Functional Pottery, The Ceramic Spectrum, Robin Hopper Ceramics, and Making Marks). As a potter, they have been integral to my development in the field. They are incredibly organized and informative. You can actually learn new techniques from these books. If I were to recommend one author to another potter, it would be Robin Hopper.

incredible Book by an incredible man and potter.

great book!

Robin Hopper is the best - this is a wonderful book. So glad I found it.

Robin Hopper is generous and giving when he shares the knowledge gathered over a lifetime of making pots. All his books are well written, full of information for potters at all levels of development, and a must for any potter's library.

Someone stole my original copy so I had to buy another copy of this wonderful book!

This book is excellent in its content for aesthetics in ceramics, particularly, functional pottery. I checked this book out from the library for several weeks before I bought my own. A great resource for potters.
