I just finished this story and I have a huge grin on my face. I really enjoyed it. Yes, there are werewolves involved, and yes, you have to suspend belief in reality a bit, but it's a story. That means the author can create a world for her story to reside in exactly the way she wants. And I like this world. I'm ready to read the next one. Each story is a stand-alone story, but it works better to read them in order. I read the sixth one first, and now I'm starting at the beginning. To summarize: Gage is the pack leader for a SWAT team made up of alpha werewolves. He meets his fated mate, then has to fight to keep her. She makes a big mistake, and has to fight to keep him. Secrets are revealed, a bad guy figured out what he's up against and there's a HEA ending. Read it. It was a great story to take my mind off of the torrential rain happening here in Texas because of hurricane Harvey. What a gift!

Hungry Like the Wolf by Paige Tyler 4.5 Stars This is a really cool read. I enjoyed it very much. Gage and his team of wolves are Swat members and are Alphas, lol, Gage is their leader and to say that things get heated between them all is an understatement. Some of their antics are hilarious. Max is the one reporter who thinks something is going on within the Swat team, but what? She stakes them out on a mission and goes head to head with Gage when he finds her trying to sneak into the building they are surrounding. I loved how Gage tormented Max in the beginning, lol. A old myth of them finding their one true soul mate just may come true, at least for Gage. What happens in between the pages is great. Great fun read, Hot Alpha men and so much more. This was my time reading this author. I was very impressed. I couldn't put the book down. The characters had a perfect bond that I could connect too. I love when you get that feeling as you grow with the characters. I will be buying the rest of the series. Overview. Mackenzie aka Mac is a reporter. She wants to investigate the Dallas SWAT team. Someone suggested that the guys are on steroids. Gage the Swat team leader and Alpha pack leader sees Mackenzie snooping around. But when she steps into the way of a hostage situation, he orders his team to bring her into the operations vehicle. What Gage didn't expect was that Mackenzie was his match aka The One. But will she love him for who he really is or will she choose her career and send him and his pack of wolfs into hiding?

This is THE ONE! You'll figure out the hidden meaning in that when you read this book! For me, this is the book I am always looking for, the one that makes me stay up late, reading in bed until I fall asleep with my iPad on the bed beside me. I did that! I could not put it down until pure exhaustion forced me to. The thing is, you see, I love shifter stories. Particularly wolf shifters. I've read some good ones over the years, but this is the first one in a long time that just hit all the right buttons and made me eat it up! Like a hungry wolf! Mackenzie and Gage are perfect! Mac is an aggressive investigative journalist with infallible instincts for a big story and Gage has a big secret to protect. When these two butt heads, the chemistry is immediate and electric! And HOT!! I haven't read anything I liked more in a very long time. I'm nearly in tears because the rest of the series is not free. I may have to break my rules eventually, but not right now. If anyone has read this series, I would love to know if every book is as good as this first one. Let me know. Meanwhile, if you love the wolfies as much as I do, pick up this free copy and Enjoy! I can't believe this was free. It was fast-paced, sexy, full of action, and a paranormal with a down-to-earth approach in the origin of werewolves. It was uncomplicated and believable without losing the excitement. It was hot, hot and hot on the sexy scale but without losing the romance of falling in love. And, it was full of characters you couldn't help but like. They tugged at your heart especially Gage who when forced into revelations, was afraid he would lose something he never thought to find and wasn't afraid to let it show. That's the kind of Alpha male we all want, strong in his work ethics and soft when it comes to love. Needless to say I downloaded the second book the minute I finished this.

Mackenzie Stone is an investigative journalist who thinks she's on the trail of hot story. The Dallas PD SWAT team is one of the best in the country. Their success rate of take downs and busts seem too good to be true. After stumbling her way into an active crime scene, instead of being arrested, she is invited by the commanding officer, Gage Dixon, to observe his men in a day in the life of scenario. His thinking, it is better to control the flow of information rather than risk having her sneak around and possibly find something she shouldn't. There is something his group of men is hiding and if it came out it would destroy all of their lives. The ensuing story line helps Mac to realize sometimes pursuing the truth isn't as

important as protecting the ones you love. The story is fast past and very engaging. I didn't want to stop reading. I would have read it one sitting if I didn't need at least a few hours of sleep. The buildup of sexual tension between Mac and Gage was well done. I also really liked the secondary characters in the story and I'm looking forward to reading their stories. My favorite part about the book was that the whole "other thing about the SWAT team being werewolves" wasn't thrown in your face. I really like the paranormal genre because the male leads all tend to be super Alpha and strong. What I don't like, is the some of the mythology authors can create. It just tends to become too unrealistic. This book could almost work and still be awesome without the whole werewolf storyline. The group of men could all of have been former Special Forces with specialized training.
