The Cool Story Behind Snow (Science Of Fun Stuff)

Synopsis

Escape from the cold and embrace the avalanche of information about snow in this fact-tastic nonfiction Level 3 Ready-to-Read, part of a series about the science of fun stuff! Did you ever wonder how snow is formed? Did you know that no two snowflakes are exactly alike? Learn about the polar vortex, different kinds of snow, how meteorologists predict snowstorms, and much more as you become a Science of Fun Stuff Expert on snow! Amaze your friends with all you've learned in this engaging, fact-filled Level 3 Ready-to-Read! A special section at the back of the book includes Common Core vetted extras on subjects like social studies and math, and there's even a fun quiz so readers can test themselves to see what they've learned! Learning science has never been so much fun!

Customer Reviews

Joe Rao serves as an instructor and guest lecturer at New York's Hayden Planetarium. He writes about astronomy for Natural History magazine, the Farmer's Almanac, Space.com, as well as many other publications. He is also an on-camera meteorologist for News 12 Westchester, New York. In 2015 he was voted "Best Local Television Personality."

by the readers of Westchester Magazine. Joe was also nominated for an Emmy in 2004, 2006, 2010, 2014, and 2016 for On-Camera Achievement. Joe, his wife Renate, and their two children Joseph and Maria, reside in Putnam County, New York. Dagney Downey is an illustrator, storyboard artist, graphic novelist, and bluegrass musician. He often works late into the night, where he gets all his good ideas when he's not chasing raccoons out of the yard. He's currently working on illustrating and writing more books for kids based on his rock band days. As a kid he wanted a pet raccoon, but not anymore.

It has been cool for us to read all about how snow forms in clouds.

Wonderful book for not only children. I even learned a few things. This book would make a great gift for a child at Christmas.

Got this as an end of school year presents for my sons K classroom and the teacher and students loved it!

I was happy with the quality and content of the book. It was fun to read with my kids. I felt like the price was a little high for what you get.

easy fun read

Just checked this out at the local library. My son, second kid to his 4th grade sister, is in kindergarten & not often one to keep up with complex storylines yet. But he really does seem to enjoy this book. We have broken it up (reading across a few nights) and we discuss what the pages mean when they get a little scientific. He likes it and is interested in reading the next one about space travel. Big sister eaves dropped on us tonight and started listening in/following along. Even she commented it was good. Not childish at all but interesting and explanatory (fun and engaging!)
