## Customer Reviews

`It is clear, thorough, well cross-referenced and deals with equipment and the organisation of the theatre, as well as with procedures themselves... almost certainly the best and most comprehensive text on surgery in developing countries.'Africa Health

Maurice King is at University of Leeds. Peter C. Bewes is at The Birmingham Accident Hospital.

This book (as well as vol. II regarding trauma) is essential to anyone wanting to spend time doing medical missions who plans on doing surgery - especially if you are not a surgeon!! I have taken this book to several countries overseas and used it to help me know what to do in a variety of surgeries. For e.g. - tubal pregnancy, exploratory laparotomy for bowel obstruction, hernia repair, etc...FYI, I am FP trained -so, this book is awesome!! If you only buy one - this is the best in the "primary" series.

Excellent Book, Highly Recommended.

Essential companion for 3rd world surgery

This book is easy to understand and goes into a lot of detail for even the novice to understand basic simple techniques. The items needed are listed also. This book should be in anyones library that is serious about prepping.

good
