## Customer Reviews

Written a while ago, but still the best choice for learning about routes and lakes along the way. The portage information is always changing as water and rain make dry trails or swamp, but this book is the clear choice to read. Distances of portages are useful and the time to do a route is perhaps most valuable info of all. I have been canoeing here for many years but always consult this book to consider any new trip. BTW, if the book says a trail is rugged, it is. Enough said. Travel light, be ready for bugs, rain, and cold (still worth it!) and you will have a great time. Do yourself a favor and call the lodges that provide outfitting on the Gunflint Trail for those entry points served by the GT. The lodge owners are very knowledgeable about conditions and will not steer you wrong. They live on repeat business and want you to have a good trip. Tell them your experience level and time available, and they will suggest a route. Voyageur is a great resource to contact. Anyway, buy the book.

This is the best series of books and author for traveling in the BWCAW.

I have frequently recommended this book for anyone who is considering a trip in this region. His descriptions of the diverse routes are clear, accurate (we've made many of the trips ourselves), and very helpful in getting a sense of the region. In addition, he includes basic information (climate, map needs, entry points, etc.) that make this an invaluable source of information

The book was in perfect condition. It looked brand new and even had the map in the back of it.
