Customer Reviews

For almost 80 years, Kaplan Test Prep (www.kaptest.com) has been helping students grow their knowledge, skills and confidence so they can be their best on Test Day. Our prep books and online resources provide the expert guidance that students need at every step of their educational journey — incorporating years of test-specific data and strategies tested by Kaplan students and our own expert psychometricians. After helping millions of students, we know what works. Our guides deliver knowledge with clarity and simplicity while focusing on the specialized strategies that keep test-takers ahead of the clock and at the top of their game. We offer preparation for more than 90 standardized tests — including entrance exams for secondary school, college, and graduate school, as well as professional licensing exams for attorneys, physicians, and nurses. With a full array of self-paced and live online courses, as well as print books and mobile apps, you can use Kaplan to study on your own schedule and at your own speed. Kaplan's private tutors and admissions consultants supplement those offerings with one-on-one support.

Compared to the other prep companies, these Kaplan books are very detailed. I used this as my main resource and then used the complete Princeton review book for follow up on each section. Lots of good review in the books and nothing you won't see. Although I did find some topics in the AAMC practice exams that were not covered in the psychology section so make sure you check the AAMC guidelines on their website for which topics they require you to know. I thought the online practice exams were pretty detailed oriented compared to the concept oriented questions found in the AAMC practice questions and exams. I scored 508s and 509s on the Kaplan exams but much higher on the AAMC practice exam, but both are still good resources I would recommend. I really used the previous version to study for 4.5 months while working full time and in an internship part time. I read all of the books, except the CARS, multiple times and answered the questions and concept checks after each section. I then took the practice exams online along with the Princeton exams during my last 6 weeks of studying. I also used the AAMC question banks (also an invaluable resource) for all of the subjects and their practice exams during those last 6 weeks. I scored in the 99th percentile and couldn't have compiled all of the necessary topics so neatly on my own. I didn't take a prep course and this set was definitely worth the money. I also used the flashcard app that comes with the physical flash cards and those were also useful to master concepts and definitions.

These books were extremely thorough (possibly a little too thorough), but really do explain all of the concepts need very well

These books are great, I recommend using them to develop a foundation and then supplement with other resources (Princeton review is a must-have). Understand, however, that the practice problems at the end of the chapter are fairly easy (and there are only 15 per chapter). Definitely consider picking up some books of practice problems on every subject (you will find that the older editions on the sciences are relevant, but you may need to buy new for anything on the updated MCAT such as behavioral sciences). One more thing: the biochemistry book is very poorly written (key points badly defined, convoluted structure), so I would just go with Princeton Review or Gold Standard and only use the Kaplan biochemistry book for its practice questions.

Bought the set for my son and he loved the set! He said it's a great set of books, and strongly recommends them.

My daughter says these are Great! Good materials, plenty of sample questions/tests and high quality materials.

Product is awesome and helpful!

Everything you need! Easy to follow, easy to understand, comprehensive reviews of the core subjects for the MCAT. I just took the exam a month ago and felt well-prepared after 4 months of steady studying with this review set. The online portion is fantastic! Lots of informative videos and the practice exams are irreplaceable, absolutely key to my studying.

thanks
