Customer Reviews

A fair guide to record collection. It did not cover prices of the records my dad had in his record collection.

I purchased this guide because I had a large volume of records that I needed to evaluate for sale...I like the organization that allows me to refer to the label pages and then type of music pages...I believe this is going to make it quicker for me to find out what does/does not have value.

Very helpful.

A big help in evaluation of albums not on other catalogues.

For serious 78 collectors only

You are better off looking at eBay for prices.

I inherited an old collection of Dixieland Jazz 78's. This box helped me feel more encouraged on values and strategies to sell the collection. We are cataloguing it now (will include some values from the book).

good reference book- a necessity for collectors... reasonable
