Age Range: 5 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

Tomie dePaola (pronounced Tommy da-POW-la) is best known for his books for children. He's been published for over 40 years and has written and/or illustrated nearly 250 books, including *Strega Nona*, *26 Fairmount Avenue*, *The Art Lesson*, and *Christmas Remembered*. Over 15 million copies of his books have sold worldwide.

This book is very informative about clouds. My 4th graders liked the illustrations. If you want to use this book as an Accelerated Reader book, be aware that the quiz is very specific. This is not a book that your students can read once or twice and pass the quiz. They need to know each kind of cloud and their descriptions. This book provides that, but the content is hard for students to remember if they haven't been studying it.

Excellent

I used this book for my grade 2 literacy book that incorporated a science activity. It has great artwork and gives simple understanding of the what is it, what does it do, and hows of cloud types (which are part of framework and benchmarks). It also tells of what other cultures and times thought of the clouds. Overall a great book with great real-life comparisons.

6 year old grandson loved this book.

Great book to help teach about clouds in a fun way. My 2nd grade students enjoyed it, I used it for a read aloud to go along with our weather unit.

Good book, just not as much for pre-k age as I'd hoped

Helped our 6/7 year old foster son not be afraid of every cloud. We needed this so he would see that clouds are good and not all of them are tornadoes.

I had this when I was a kid and just purchased for my own child:)
