Customer Reviews

Let me start by saying that Vincent knows his stuff when it comes to art, drawing and sketching. His online platform and drawing portfolio is quite impressive and he's done many very nice looking sketches. It's obvious he loves creating works of art for others to enjoy. He hits the nail on the head with the demand for his subject matter as well. Making his work personal to his customers is key and a great way to maintain consistent interest and sales. Personalized subject matter like parents, grandparents, children and pets are perfect! Let me be clear that this book isn't about drawing, sketching techniques, method and tools but really about the business side and how to profit and potentially make a living from your art work. In a past life, I worked on sketching and really enjoyed it. With this book, I now have great hopes of returning back to my calling. I purchased this book as it appeared compelling that one could actually make a living doing something they enjoyed. Vincent

has hit upon a very hot topic nowadays in which people are hungry to turn their passions, desires and interests into streams of sustainable supplemental income. So many people are fed up with their boring dead end jobs and desperately seeking a way out. I believe this book is a great catalyst in making an investment in yourself and your future. He shares a number of great platforms to showcase your work. My initial concern was that maintaining and interacting on all those platforms can be very time consuming and actually burdensome. Vincent reassures that this is really not the case. It really only takes a few minutes a day allowing you to return to the more enjoyable tasks of creating artwork. I'm really looking forward to setting up and advertising on all the platforms he mentions. If you're considering turning your interest and love of art into a profitable venture.... you should buy this book. This book carries my highest recommendation.

I am in the initial stages of starting my arts business online, and this book certainly made me realize that artists don't have to starve! I got some unique ideas about advertising my art in places where I had not thought about at all - online flea markets and free ads. I have been able to define keyword rich ads and use the smart pricing strategies suggested by the author. I have also set up my Pinterest account based on his suggestions, and I am generating interest! This is a very useful resource!

This is the second of Vincent Noot's books that I have read. After reading his "How to Draw Realistic Pencil Portraits" and getting some experience at drawing from a photograph, I thought, why not try to make a little money doing this, so I downloaded this one. And I'm not disappointed. Right now, my drawings are just a hobby, but someday, when the talent kicks in, maybe I'll take my new found experience to a trade show, or fair like Mr. Noot has. The book talks about how to market your work on websites, Ebay, Social Media, going to Events and making up handouts and basically how to talk it up.

Disappointed that this book had only 32 pages (5.5" x 9" - big letters) that included an inside front cover page, Table of contents and 3 pages advertising his next book. The information in the book was factual common sense information. Nothing really new if you live in our today's world.

An amazing book, that brings a breath of fresh air to the table. This book does not talk about the usual making money "quick fixes" such as how to look for the best platform, or where to invest blah blah... It does however help you find a new, fair way to talk with your inner self and make plans

about your goals of making money with your drawing skills. This is a very helpful book for the novice who is just contemplating becoming involved in art business. It starts at the real beginnings. Your beginnings, to reflect on how you look at and value money. It also covers both the basics of drawing portraits, as a refresher, such as proportions, anatomy, rendering as well as more advanced tips and techniques. If you are considering a venture into the craft world, this book seems very helpful. It is a great guide to help you turn a profit with your own crafts.

Here is a book that inspired me and gave me a new idea to make money from home
by drawing portraits! I loved that this book was written from the
author's personal experience of how he has made this into a profitable side
income. The book was written in an easy to understand and easy to follow way, especially for
newbies. Very importantly it also reveals some specific methods he has used for successfully
getting customers through online channels (I won't share them here
you will have to read the book). A worthwhile read!

The author definitely knows his online marketing in this field, and I don't see how you couldn't
increase your income if you used all the methods outlined in this book. Doing so will definitely get
your name out there, get yourself noticed, bring in repeat customers and more. I enjoyed the social
media strategies listed and started implementing them right away, effectively increasing my Twitter
and Pinterest following. Enjoyed the original content.

Really interesting way of making some extra money even if you don't intend to do it full-time. It
seems like something I might try out and based on the book it looks very promising. This is a good
guide so I recommend getting it if you're interested.
