Cy Tymony has created his homemade inventions since he was a kid. His imagination and innovative way at looking at the world continues today as a technical writer and computer network specialist in the Los Angeles area. He has appeared on CNN and NPR, and has been featured in the Los Angeles Times and U.S. News and World Report.

I bought this book along with another book in the series, *Sneakiest Uses for Everyday Things*:

How to Make a Boomerang with a Business Card, Convert a Pencil into a Microphone, Make Animated Origami, Turn a TV ... Create Alternative Energy Science Projects, and was severely disappointed when I found out that a majority of the content in this book was EXACTLY the same as in the other book! I felt really cheated. And a lot of the projects aren't very "green," like making animated origami or business-card boomerangs. Rather, they seem like they're just there to pad out the book, which otherwise is pretty sparse. Finally, the projects in it don't seem very fun or useful. I gave it two stars, as opposed to one, because I don't think that it's complete junk, but I recommend purchasing any of the other "Sneaky" books and skipping this one completely.

I thought this book would be cooler than it was. I bought several of the books in this series in hopes that it would inspire lots of fun projects. and maybe it would if I were 10-12yrs old. There's a few neat things here and there but overall not great.

A very interesting read and a great little book. Love the entire series.

A fun read for on and all.

I purchased this book as a Gift to my son, he loves these books. Anything that makes him happy is good with me.

my son-in-law can fix anything and this was a fun book for him to read and use as a practical guide

My nine year old niece likes it, and it looked pretty cool, when i flipped through it. I have not personally done any of the experiments.
