# DEWALT Contractor's Daily Logbook & Jobsite Reference (DEWALT Series)

## Synopsis

The secrets of today's successful contractors include two things: having a way to logically and efficiently document jobsite activity, as well as the resources and references to complete the documentation. This new book gives you both. DEWALT Contractor's Daily Log & Jobsite Handbook is a two-in-one resource that provides all of the necessary elements needed to effectively run and complete a construction project. Part One offers daily log pages, carefully designed to assist contractors in documenting everything necessary on the jobsite, from daily activities to weather conditions to schedule, deliveries, subcontractors, OSHA requirements, and more. Part Two complements the preceding section by including a variety of resources related to the daily log, including a math/calculations section, an extensive jobsite safety/OSHA requirements section, Spanish/English translations and a comprehensive reference section. An ideal tool for contractors, builders, maintenance managers, and construction managers alike, its consistent use can prove invaluable in the progress of a project, especially in preparing for potential legal matters that may arise.

**Key Logbook Features**

- Carefully designed log system providing a quick and easy entry process
- Log pages for every day of one work year
- Additional logs/forms included for various ancillary applications:
  - Equipment and material purchases
  - Accident reports
  - Contact records
  - Safety checklists

ISBN-10: 143549993X

ISBN-13: 978-1435499935

Product Dimensions: 8.5 x 1 x 10 inches

Shipping Weight: 1.7 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 15 customer reviews

Best Sellers Rank: #198,471 in Books (See Top 100 in Books) #29 in [Books > Crafts, Hobbies & Home > Home Improvement & Design > How-to & Home Improvements > Contracting](#) #458 in [Books > Crafts, Hobbies & Home > Home Improvement & Design > How-to & Home Improvements > Design & Construction](#) #625 in [Books > Engineering & Transportation > Engineering > Construction](#)

## Customer Reviews

Chris Prince has been in the construction industry for the past 15 years, both in the field and formal training. By developing courses and teaching in live classroom settings, he has helped more than 10,000 candidates across the country prepare for state licensing exams. Mr. Prince has been instrumental in launching an online training program for residential and commercial contractors, with emphasis on building theory, codes, licensing, lien laws, business management, ethics, OSHA, contract law, payroll, and project management. He is a graduate of Middle Tennessee State University. American Contractors Educational Services has successfully prepared candidates for state required licensing exams since 1991. A team of full time instructors comprises field experience, training expertise and formal education to formulate an effective and dynamic approach to concisely present pertinent test information in a seminar format.

Let's face it, most contractors are not good at keeping records & doing admin. I took a shot & bought DeWalt's Daily Logbook with low expectations. To my surprise, the basic format & simple layout have been accepted by staff & to date it's being used daily. To me, a reasonable list of the Who-What-When-Why & the logging of job site activity is invaluable. Dropping \$18 bucks on this DeWalt tool was money well spent.

Is okay for maintaining a daily log. Last thing on my mind at end of day is writing notes, so I found that if I leave it on seat of truck it forces me to do it. It is good to have notations of what happened throughout the day.

It gives your foremen a good reference when providing status updates, it gives you an account for each day (we include any conversations had in relation to project w/GC or other contractors). We will use them on all of our projects from here on out!

The quality of the book is great. Nice and sturdy. Each page has plenty of boxes to add things, but some things are not needed. It's kind of a catch all for info, but I don't need to mark down the weather everyday unless it's bad and causing delays. Also don't need to mark down the completion date every single day. I know I can just skip those areas, but it leaves a lot of wasted space per page. I think I'm going back to the old ledger book.

Great for field notes etc...

Thanks

there is a place on each page that you can mark what the weather was like... I think this space could of been used for something more useful... all in all a good Book

Love it!
