NATIONAL GEOGRAPHIC KIDS inspires young adventurers to explore the world through

award-winning magazines, books, website, apps, games, toys, television series and events and is the only kids brand with a world-class scientific organization at its core.

While this is part of the 'Kids' line, there is a lot here to keep the older sibling and adult interested. The presentation is what has come to be expected from the folks at National Geographic with excellent photos and vibrant colours to attract and keep the attention of the kids, while keeping the adult interested while reading to them. By the way, Be warned that I do recommend that you read it as well either to them, with them, or on your own lest you come up seriously short as your young charges bombard you with questions on some of the MANY trivia facts that this book so superbly brings to them. Note...you have been warned.

The National Geographic line of kids' books always pleases our family. My bright 7 year old loves this book and tries to "stump" Mom and Dad with the trivia questions. There are different sections, which focus on a specific area, and the questions provide answer choices (a,b,c or d) with the answers in the back of the book. With the different areas of focus, he learns several facts about each topic. And he is becoming accustomed to the multiple choice answer format found in school. It is great for a car ride to encourage family interaction and provide an alternative to video games. My son learns while having fun, which is an A+ in my book.

Great book for kids to learn fun facts.

I love trivia and always buy my son an activity magazine for holidays. This one is a little cumbersome in that the answers are on a separate page. This is probably a must for serious trivia folks but it made it a little annoying to take the quizzes. Great questions though and we had a ball!

I ordered this book to have when my 8 year old Grandson visited and we spend many hours reading and talking about all the new facts. He loves puzzles, jokes and loved all the fun facts. It started many conversations. I have bought National Geographic books for kids before and never been disappointed.

The content of this book is great! It is filled with mini quizzes and my 8 year old loved it, however, it is poorly made. The binding fell apart as soon as it arrived and pages started falling out right and left. For a National Geographic Book I would think it would hold up a little better, I would recommend

buying this in the library binding or hardcover if available.

My grandson and I had a lot of fun with this book in NYC . I bought the same book again. Plan to face time with him at my home in California.

This book was ok. The format is a little hard to work with, it would be better if the answers were closer in the book to the questions. Having to look all the way in the back and navigate between many other subject answers was a pain. Also, the binding on the book if terrible. The pages all started falling out after only a few uses.
