L. Ron Hubbard is the founder of Scientology. He has described his philosophies in more than 5,000 writings, including dozens of books, and three thousand tape recorded lectures. Those who regularly employ his teachings to improve themselves and help their fellows come from all walks of life. The universal acclaim for the man – including thousands of awards and recognitions from individuals and groups and the unprecedented popularity of his works among all people – is but one indicator of the effectiveness of his technologies. More importantly, there are millions of people around the world who consider they have no greater friend.
